Severe Impacts

# **WEATHER KEY POINTS**

**03/29/22 - 04/04/22**

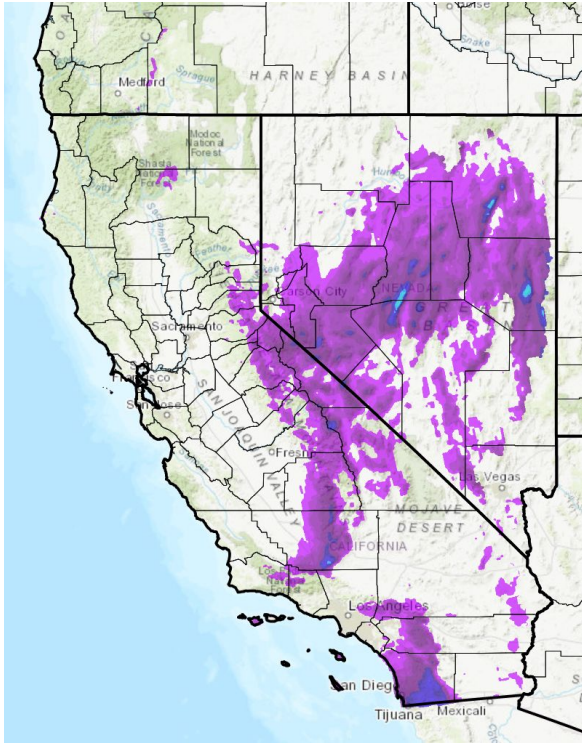

## **Tuesday - Monday**

- Lingering rain and high elevation snow will diminish across southern California through late morning, with mainly dry weather returning for most areas through the weekend
  - Some very light additional showers are possible over far northern California by late in the weekend or early next week
- Gusty westerly winds will persist over the southern Sierra and southern California mountains through late Tuesday evening, with gusts of 35 to locally 45 mph expected
- Additional gusty north winds are expected over the northern Sacramento Valley on Thursday, with locally elevated fire weather conditions possible, though recent rainfall will decrease the overall risk
- A warming trend is expected through late week and the weekend, with some minor heat impacts over the Central Valley and southern California as temperatures warm into the 80s

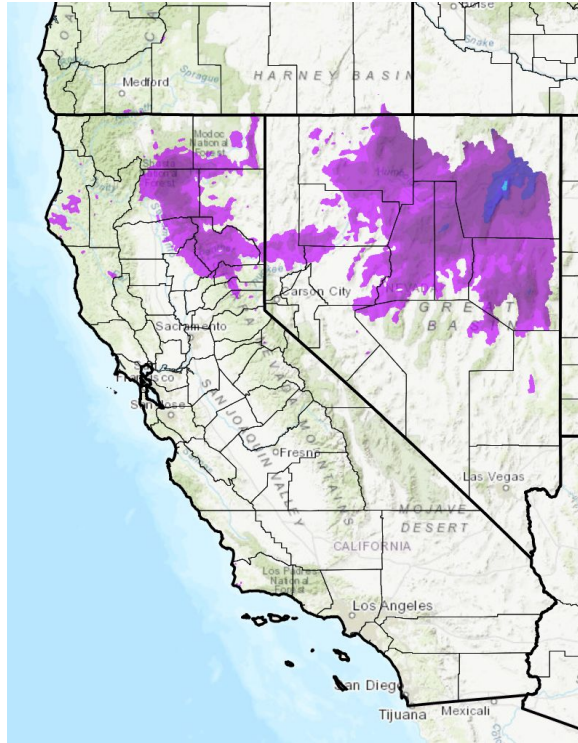

# PRECIPITATION FORECAST

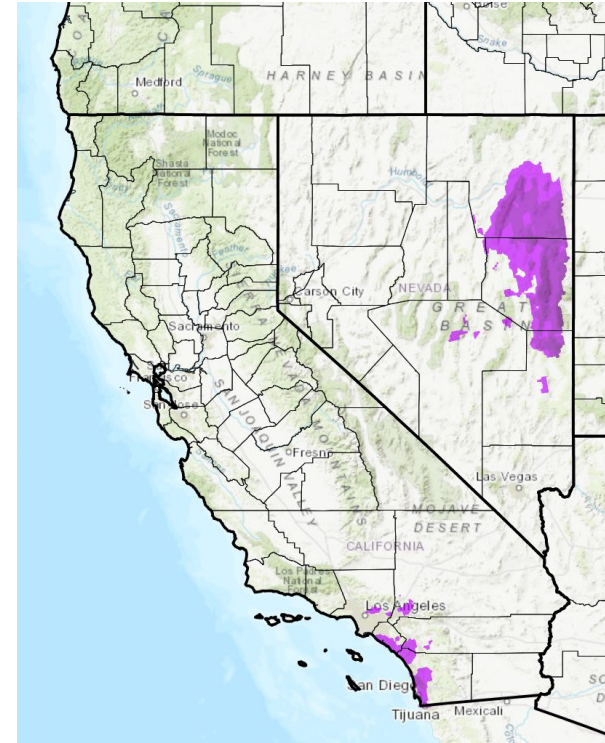

03/29/22 - 03/31/22

**Tuesday**

**Wednesday**

**Thursday**

**Note:** Forecast precipitation amounts are an average for any particular location. Thunderstorms may produce locally higher rainfall amounts.

**Precipitation (inches)**

# **WEATHER OUTLOOK**

**04/03/22 - 04/11/22**

## **6-10 Day Outlook (April 3 - April 7)**

### **Temperatures**

- Above normal temperatures are favored statewide

### **Precipitation**

- Below normal precipitation is favored for much of the state, except for far southern California where near normal precipitation is expected

## **8-14 Day Outlook (April 5 – April 11)**

### **Temperatures**

- Above normal temperatures are strongly favored to continue statewide

### **Precipitation**

- Below normal precipitation is favored across northern and central California, with near normal precipitation favored for southern California
